

## Introduction to the EU

As Croatia has recently become a full member of the European Union, it is extremely important that students, who are about to enter the business world, are familiar with the bodies and institutions that will affect the way business is done in their organizations. For this reason, it is necessary to explain the complexity of the European Union, and to emphasize how the process of European integration is still incomplete. For this reason, one of this course's goals is to help students adapt when doing business in this new reality of globalization. By learning to adapt to the European legal framework, students will increase the stability of their business, avoid unnecessary additional costs, and avoid damages that arise from improper or illegal business activities.
